

tʃeɪndʒɪŋ pleɪsəz

By Tom McCoy

The grid is to be completed in the International Phonetic Alphabet. The next page contains notes on the transcription style. The shaded answers are all puns created by a particular phonological process—see if you can identify the phonological process in question!

Across

1. What) stands for in an emoticon
5. "My, my!"
9. Some Clorox products
13. Veranda

50. Without a doubt
51. "Leave me ____!"
52. Requires
55. Uncertain

Transcription notes

1. The pronunciations are based on American English.
2. If you have the cot/caught merger: The cot/caught distinction does matter in this puzzle, but only before /ɹ/. (See below for examples of the specific vowels used before /ɹ/). For example, “port” /pɔɹt/ and “part” /pɑɹt/ would be different in the grid. So, if you have the merger and end up with an answer that doesn’t make sense, check whether it makes sense if you swap /ɔ/ for /ɑ/, or vice versa, before an /ɹ/.
3. The puzzle assumes you have the Mary-merry-marry merger (i.e., all three of those would be transcribed /mɛɹi/).
4. The transcriptions are taken from the CMU pronouncing dictionary:
<http://www.speech.cs.cmu.edu/cgi-bin/cmudict>.
5. In general, the transcriptions are broad/phonemic. Thus, there will not be any aspiration, glottalization, or taps/flaps.
 - a. Examples:
 - i. tape: /tɛɪp/
 - ii. button: /bʌtən/
 - iii. writer: /ɹaɪtə/
 - iv. rider: /ɹaɪdə/
 - b. One exception is that, when a vowel is reduced, it will be reflected in the transcription as either ə or ɪ:
 - i. elaboration: /ɪləbəˈeɪʃən/
 - ii. the: /ðə/
 - c. The other exception is that the past tense morpheme and the plural morpheme are transcribed as their various allomorphs:
 - i. dogs: /dɔgz/
 - ii. cats: /kæts/
 - iii. horses: /hɔɪsəz/
 - iv. walked: /wɔkt/
 - v. jogged: /dʒəgd/
 - vi. waited: /weɪtəd/
6. Syllabic r is used, but there are no other syllabic consonants. Syllabic n, syllabic m, and syllabic l are transcribed as /ən/, /əm/, and /əl/, respectively.
7. Stress and syllable boundaries are not indicated.
 - a. No distinction is made between ʌ and ɜ, or between ə and ʌ.
8. The vowels that are used before r may be unintuitive. Here are examples:
 - a. heard: /hɛd/
 - b. mark: /mɑɪk/
 - c. year: /jɪr/
 - d. square: /skwɛɹ/
 - e. power: /paʊə/
 - f. tore: /tɔɹ/
9. There is one phoneme per square, even if the phoneme contains two symbols (i.e., a diphthong or affricate).
